

NSA U23 girls finish 2009 undefeated in league play

This summer NSA fielded a U23 team made up of college soccer players from the area, many of whom grew up and played for NSA through the years. The U23 team was developed in order to help college soccer players have a productive training environment over the summer break. The goals of this program are to help the girls: stay fit, maintain technical sharpness, and prepare for the upcoming college preseason/season.

All of these goals were accomplished, as well as seeing friends and having fun along the way. The girls finished the summer season with a record of 5-0-3 in league games, scoring 23 goals in these 8 games. Throughout the summer the players attended the 8 regular season games, a couple of friendly scrimmages, and 2 or 3 weekly practices.

NSA would like to thank the players who participated and made the 2009 summer season a success! Below is a list of the NSA U23 players and the college they attend.

Morgan Alberts:	University of Illinois
Katie Anderson:	Drake University
Amy Baschen:	Elmhurst College
